

Figure 46

*Chloromyxum majori* spores (arrow) in wet mount made from an adult rainbow trout kidney.

Phase contrast. X3500.

Figure 47

*C. majori* trophozoites and spores in kidney glomeruli of a 6-month-old Chinook salmon. Note basophilic spores and trophozoites occupying much of the glomeruli, leaving very little of the capillary tufts (arrows).

M-G G stain. X1500.

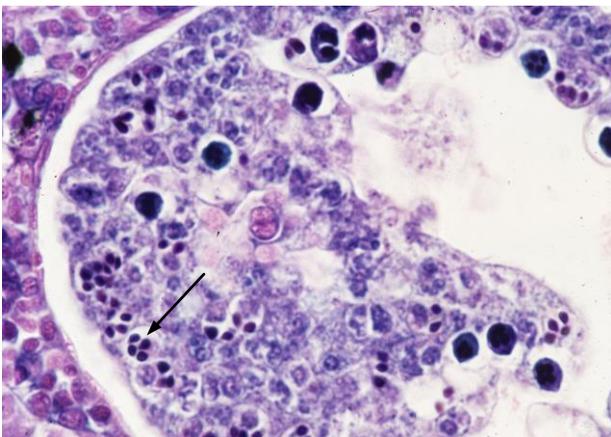

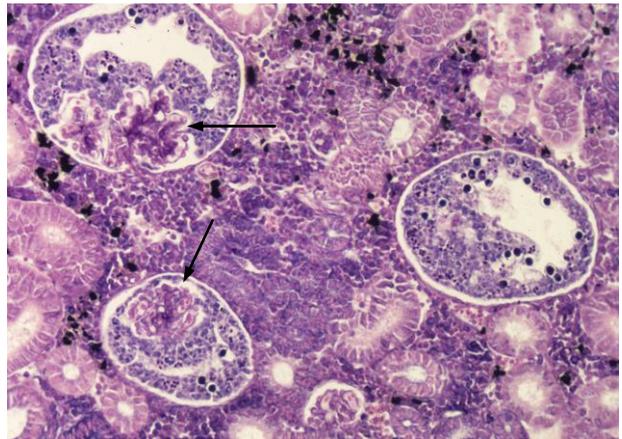

Figure 48

*C. majori* trophozoites and spores. Higher magnification of Fig. 47. Note the four polar capsules of a spore clustered together (arrow).

M-G G stain. X1500.
