Figure 50

*Myxidium minteri* trophozoites and spores in the lumen of a fingerling steelhead trout kidney tubules. Note the spore with polar capsules (arrows).

M-G G stain. X900.

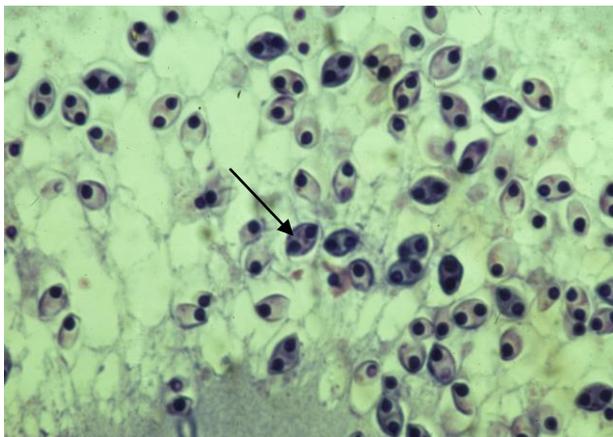

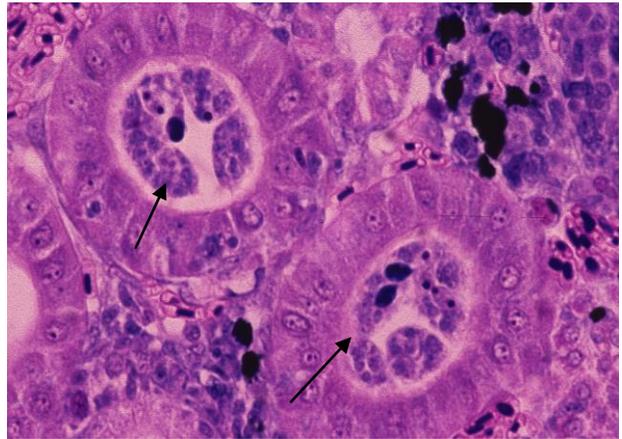

Figure 51

*Myxidium* sp. cyst in a 2-year-old rainbow trout liver. One pyriform or spherical polar capsule occurs on each end of the spore (arrows).

M-G G stain. X1500.
